Human BCMA/TNFRSF17 Protein

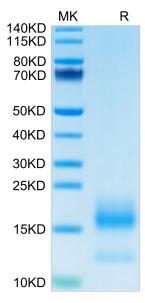

Cat. No. BCM-HM117

Description	
Source	Recombinant Human BCMA/TNFRSF17 Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus.
	It contains Met1-Ala54.
Accession	Q02223-1
Molecular Weight	The protein has a predicted MW of 8.9 kDa. Due to glycosylation, the protein migrates to 12 kDa and 15-17 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE
Formulation and Storage	
Formulation	Lyophilized from 0.22 μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Background	
	B-cell maturation antigen (BCMA or BCM), also known as tumor necrosis factor receptor superfamily member 17 (TNFRSF17), is a protein that in humans is encoded by the TNFRSF17 gene. TNFRSF17 is a cell surface receptor of the TNF receptor superfamily which recognizes B-cell activating factor (BAFF).

Assay Data

Bis-Tris PAGE

Human BCMA on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

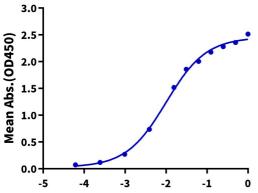

ELISA Data

Assay Data

Human BCMA, His Tag ELISA

0.1μg Human BCMA, His Tag Per Well

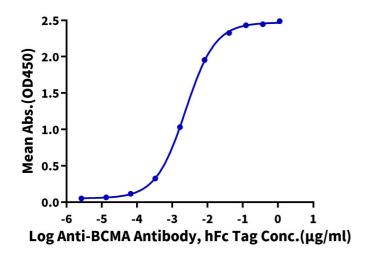

Log Biotinylated Human BAFF, His Avi Tag Conc.(µg/ml)

ELISA Data

Human BCMA, His Tag ELISA

0.05μg Human BCMA, His Tag Per Well

(100 μ l/well) on the plate. Dose response curve for Biotinylated Human BAFF, His Tag with the EC50 of 10.1 ng/ml determined by ELISA (QC Test).

Immobilized Human BCMA, His Tag at 1 µg/ml

Immobilized Human BCMA, His Tag at $0.5 \mu g/ml$ (100 $\mu l/Well$) on the plate. Dose response curve for Anti-BCMA Antibody, hFc Tag with the EC50 of 2.4 ng/ml determined by ELISA.
